

ONE RIFLE. FOUR CALIBRES.

WIKIBUSINESS · FULL SHOPPING EDITION

MRA RENEGADE MK II

EVERY COMPONENT · PICTURED · PRICED · TAXED

The complete corrected build, one page per component: what it is, where the best verified Canadian price is, the direct product link, and the Quebec tax on every line. Prices verified October 30, 2026.

PARTS SUBTOTAL	QC TAXES (14.975%)	ALL-IN TOTAL
\$2,977.92	\$445.94	\$3,423.86

Component photos are studio renders created for this presentation. A valid PAL is required to purchase the firearm. Retailer shipping fees are extra and vary by store and province.

Component cards

01 · THE RIFLE

MRA Renegade MK II — .223 Wylde, 16"

Spring-assisted straight-pull, manually operated. Non-Restricted in Canada (FRN #198524). The receiver takes standard AR-pattern barrels, which is what makes the whole four-calibre plan possible.

Best verified source: G4C Gun Store — in stock (MRA direct shows no public price)

\$1,499.99

QC tax \$224.62

With tax \$1,724.61

BEST PRICE: \$1,499.99 is the best verified in-stock price. RDSC lists the same rifle at \$1,539.99; Firearms Outlet Canada at \$1,549.95 (out of stock). A 19" version exists at \$1,499.00-\$1,499.99.

Direct link: g4cgunstore.com/product/maple-ridge-armoury-renegade-rifle-mk-ii-223-wylde-16-black/

02 · BARREL — .300 BLACKOUT

Faxon Gunner 16" — .300 AAC Blackout, 1:8

The easy conversion: same bolt face and same magazines as the base .223 rifle. Barrel swap only. (True length is 16", not the 16.5" the source documents claim.)

Best verified source: RDSC — in stock

\$259.99

QC tax \$38.93

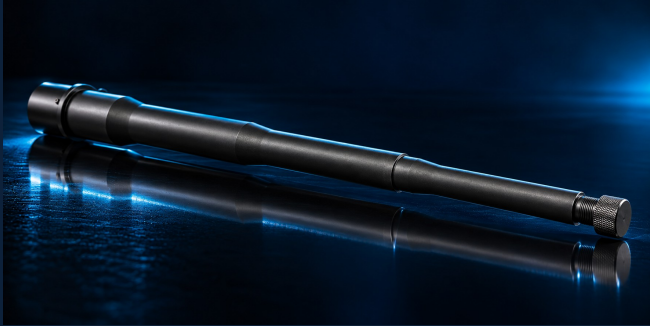

With tax \$298.92

BEST PRICE: \$100 cheaper at RDSC than the \$359.99 listed at True North Arms for the same Faxon barrel.

Direct link: rdsc.ca/semi-auto-rifle-parts/barrels/faxon-firearms-16-0-gunner-series-barrel-4150-qpq-nitride-carbine-length-gas-300...

Component cards

03 · BARREL — 7.62X39

Faxon Gunner 16" — 7.62x39, 1:8, 5/8"-24

Replaces the "CNA match" barrel named in the source documents — that product appears in no current Canadian catalogue. The Faxon Gunner is the in-spec equivalent: 5/8"-24 muzzle thread, mid-length gas.

Best verified source: True North Arms (configurable Gunner page — select 7.62x39, 16")

\$359.99

QC tax \$53.91

With tax \$413.90

Only verified Canadian source for the 16" version. RDSC stocks the 10.5" only.

Direct link: truenortharms.com/ar15_default_store_view/faxon-gunner-ar15-barrel.html

Affiliate link (manufacturer direct, US store): <https://sovrn.co/1qam1uj>

04 · BARREL — 6.5 GRENDAL

Faxon Gunner 16" — 6.5 Grendel II

Replaces the "International" barrel named in the source documents, which likewise cannot be found at any Canadian retailer. Medium target profile; stays supersonic well past 500 yards.

Best verified source: True North Arms (configurable Gunner page — select 6.5 Grendel II, 16")

\$359.99

QC tax \$53.91

With tax \$413.90

RDSC alternative is a 20" Ballistic Advantage DMR at \$399.99 — longer and heavier than this build calls for.

Affiliate link (manufacturer direct, US store): <https://sovrn.co/10wpto2>

Component cards

05 · BOLT — 6.5 GRENDL

Faxon Type II Bolt — .136" face, 9310 steel, nitride

For the Grendel barrel ONLY. The source documents claim this one bolt also runs 7.62x39 — Faxon's own specification says it does not. The rim diameter matches; the face depth does not.

Best verified source: RDSC — in stock

\$119.99

QC tax \$17.97

With tax \$137.96

Bolt only (the Renegade uses its own proprietary carrier).

Direct link: rdsc.ca/faxon-firearms-6-5-grendel-bolt-nitride.html

Affiliate link (manufacturer direct, US store): <https://sovrn.co/n2br4av>

06 · BOLT — 7.62X39

Faxon Type 1 Bolt — .125" face, 9310 steel, nitride

The second bolt the corrected build requires — the one both source documents forgot. Correct face depth for 7.62x39 headspace.

Best verified source: RDSC — in stock

\$119.99

QC tax \$17.97

With tax \$137.96

Same price as the Grendel bolt; budget for both.

Direct link: rdsc.ca/faxon-firearms-7-62x39-bolt-nitride.html

Component cards

07 · MAGAZINE — 7.62X39

ProMag 5/30 — AR-15 7.62x39, pinned steel

The pronounced curve exists for a reason: the 7.62x39 case taper needs it to feed without nose-diving. Pinned to the Canadian 5-round limit.

Best verified source: True North Arms

\$58.27

QC tax \$8.73

With tax \$67.00

VALUE PICK: C-Products DURAMAG SS 5/20 at Wolverine Supplies, \$38.95 in stock — same job, \$19.32 less (wolverinesupplies.com). The source docs' \$39.95 Bullseye North listing could not be found.

Direct link: truenortharms.com/ar15_default_store_view/promag-5-30-round-magazine-for-ar-15-7-62x39.html

08 · MAGAZINE — 6.5 GRENDL

DURAMAG SS 5-round — 6.5 Grendel / 6mm ARC

Calibre-specific stainless magazine with the blue anti-tilt follower — matches the source documents' spec at a lower verified price.

Best verified source: True North Arms

\$32.79

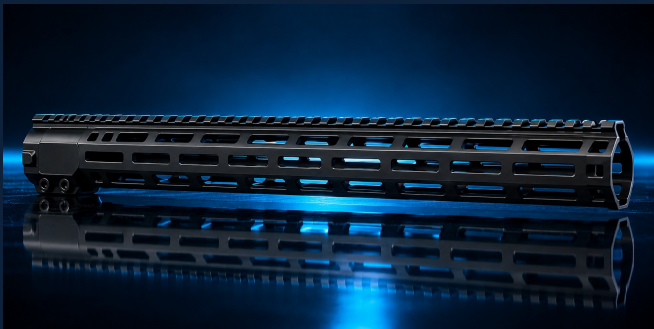

QC tax \$4.91

With tax \$37.70

Cheaper than the \$44.95 the source documents list at Tenda (Tenda's price could not be re-verified).

Direct link: truenortharms.com/c-products-defense-5x65041186cpd-5rd-6-5-grendel-6mm-arc-duramag-ss-stainless-steel-magazine-black-t...

Component cards

09 · HANDGUARD

TNA Super M-LOK 15" — free-float

The part the showroom document recommends but forgets to charge for. A slip-off free-float handguard is what makes bench barrel swaps practical on the monolithic receiver.

Best verified source: True North Arms (house product; \$115.75-\$166.92 by length/colour; 15" at top of range)

\$166.92

QC tax \$25.00

With tax \$191.92

Sold only by True North Arms.

Direct link: truenortharms.com/super-m-lok-handguard-easy-install.html

SECTION — TOTALS, TAXES & FEES

The complete bill

Every line at its best verified price, with Quebec taxes (GST 5% + QST 9.975% = 14.975%) applied per item.

TOTAL — COMPLETE BUILD	\$2,977.92	\$445.94	\$3,423.86
-------------------------------	------------	----------	-------------------

FEES & FINE PRINT

- Shipping is NOT included above. Each retailer sets its own shipping fee; firearms in Canada ship under carrier rules for licensed goods and the rifle will require PAL verification at checkout.
- Taxes shown are the Quebec consumer rates. Other provinces differ (e.g. Ontario HST 13%, Alberta GST 5% only).
- The value variant — DURAMAG 7.62x39 magazine (\$38.95, Wolverine Supplies) instead of the ProMag — brings the all-in total to \$3,401.65.
- Skipping the handguard (not recommended for a swap-focused build) brings it to \$3,231.95 all-in.
- Prices were verified live on October 30, 2026 and can change; stock notes reflect that date.
- None of the four retailers in this build (G4C Gun Store, RDSC, True North Arms, Wolverine Supplies) offers a public affiliate program, so their links here are plain direct links. The five Faxon parts also carry a Sovrn affiliate link to the manufacturer US store (6% program) as a direct alternative.
